Metro Ticket Generating System in ServiceNow

Date	16 October 2026	**Project Name**	Metro Ticket Generating System in ServiceNow	**Maximum Marks**	2 Marks

Problem–Solution Fit

The Metro Ticket Generating System in ServiceNow addresses common passenger challenges during metro ticket booking, such as time-consuming purchase steps, unclear fare information, and difficulty tracking ticket requests. The proposed solution provides a structured online booking process, dynamic fare calculation, approval workflow, digital ticket generation, and request-status tracking.

Purpose

• Solve passenger ticket-booking problems through a solution that fits commuter needs.

• Improve adoption by providing a clear, accessible Service Portal booking process.

• Communicate ticket options, fare calculations, approval status, and ticket details clearly.

• Reduce recurring passenger frustrations through validation, automated notifications, and ticket-status visibility.

• Understand the current booking experience and identify opportunities to make it simpler and more reliable.

Problem–Solution Fit Canvas

TARGET USERS

• Metro commuters booking single, return, or pass tickets.

• Approvers or transport administrators reviewing requests.

• Administrators managing stations, routes, and fare rules.

PROBLEMS / NEEDS

• Ticket booking steps can be confusing or time-consuming.

• Passengers need correct source, destination, ticket type, and fare information.

• Users need clear updates on approvals, ticket generation, and cancellations.

PROPOSED SOLUTION

• Service Portal ticket-booking form.

• Input validation and dynamic fare calculation.

• Flow Designer approval workflow and notifications.

• Digital ticket/pass delivery and status tracking.

KEY BENEFITS

• Clearer ticket selection and fare summary.

• Less manual follow-up through automated notifications.

• Better visibility of request and ticket status.

SUCCESS INDICATORS

• Fare summary updates within the stated 1.5-second target.

• Unique ticket numbers and clear status transitions.

• Secure access to passenger details and fare configuration.

Solution Fit

The proposed ServiceNow solution connects passenger needs with specific system features: booking forms capture travel details, scripts validate entries and calculate fares, Flow Designer supports approvals, and ticket generation with notifications provides a traceable booking outcome. These features are intended to make the ticketing process clearer, more consistent, and easier to track.
